Lawn Soaker is a ready to use soil wetting agent specifically developed for use on lawns. It improves the penetration of water so it can reach deep down to the roots. Regular use will ensure the soil re-wets and prevents further dry spots from forming.

Apply as frequently as necessary to treat water repellent soil and improve drought resistance.

DIRECTIONS FOR USE:

- Attach hose-on bottle to the hose
- Remove plastic plug from the sprayer
- Turn on the tap (the sprayer will immediately start spraying Lawn Soaker)
- Stop spraying by removing the bottle from the hose or by turning off the tap
- Lightly irrigate after application to get best results

SAFETY

Avoid contact with the eyes. If eye contact occurs, flush eyes under running water immediately. If irritation occurs seek medical advice.
